INTRODUCTION

We are METAMAN COIN. The core development team at METAMAN Coin has not only been a part of trading but researching projects- on BSC and Ethereum. In our time going over project after project we came across a common roadblock that projects encountered, to push and expedite their development after they were launched. Too many projects failed to deliver a working product for its consumers and investors that would ensure security and viability. We recognized this problem and decided to bring to our community a product that will be ready to use at launch. Our vision is to have a platform that is ever evolving. This helps us to achieve our objective which is twofold, to ensure our investors security while also ensuring the longevity of METAMAN Coin.

Being a meme coin will not limit but enable us to target and diversify different use cases that have never been achieved by a meme coin before. We are excited to share more developmental plans which will take shape as the platform grows. We are working on our wallet, P2E game and NFT marketplace at present however this is just the beginning for METAMAN Coin. The community will play a major role in guiding us where they want to see development as we want to ensure that METAMAN Coin stakeholders have a say in the future of METAMAN Coin.

We the team at METAMAN Coin believe being developers on the network, we owe the community full transparency. While ensuring that, we also believe in making the network hospitable for new investors and having the knowledge and capability backed by a top-notch developing team here at METAMAN Coin will enable us to help investors make an informed decision before investing We stick very strongly to our core values of utility, which means we know no boundaries and recognize no limitations what we can achieve in terms of utilities with this project, the possibilities are endless. Trust, the most important asset of building this business being transparent with the community and bringing them along with every decision being made so the people always feel they had their part in the evolution of this marvel which METAMAN Coin most definitely will be. Security, aiming to ensure that every one of METAMAN Coin holders can feel safe with their investment.

ABOUT METAMAN

METAMANCOIN is a deflationary yield-generating token. METAMANCOIN is creating a non-custodial, fully on-chain, mobile-first decentralized exchange (DEX) that supports up to 5x margin/leverage trading--all with a seamless, centralized-exchange feel for the BSC ecosystem. We will be launching the initial version of our mobile app for both iOS and Android that allows you to track your holdings on the bsc network including tether and peg coins, within the app we have customized are api to track MetaMan value in all currencies. METAMANCOIN has a 10% tax on every transaction. 4% is distributed to holders, 1% to BUYBACKANDBURN, 5% is auto locked into the LP pool, increasing rewards for holders and making the coin more stable over time.

Auto Liquidity Generation Mechanism

In many Defi projects, we have seen a lot of investors jump in and buy a large number of assets causing a huge uproar and a lot of pumps that we like to see. once the chart starts going up you it becomes pretty hard not to jump in however almost always the token suffers an impending collapse of price. Once the bandwagons are full and the big holders sell the graph sees a downward plunge and the common trader suffers a great loss.

Now what is the reason behind such a big loss to price?

Liquidity pools store a pair of assets, the token and another currency (mostly BNB on BSC). When the pool loses a lot of BNB, the price of the other token shoots down and this leads to loss of value and those scary red lines.

This effect increases in a smaller liquidity pool and decreases as the liquidity pool increases in both tokens. This is the reason why we have integrated an auto liquidity generating function that not only solves the high price variation problem but also strengthens METAMAN's future.

The Automatic Liquidity Generation feature within \$METAMAN's smart contract is recently very popular , yet very innovative core module that the protocol has implemented. It involves a feature that on every transaction causes a certain percentage of the trades value to automatically generate liquidity in PancakeSwap liquidity pools. The mechanism benefits from a specific percentage (6%) is cut on each transaction this disincentivizes "paperhands" to sell as they will receive a lesser value when they sell causing them to hold until a large increase is seen.

VALUES

UTILITY

UTILITY is crucial in providing a token on BSC with longevity MetaMan will be releasing Play to Earn (P2E) blockchain game, allowing users to earn rewards, purchase non-fungible tokens (NFTs) to use within the game, A Wallet, a NFT Marketplace and much more.

SECURITY

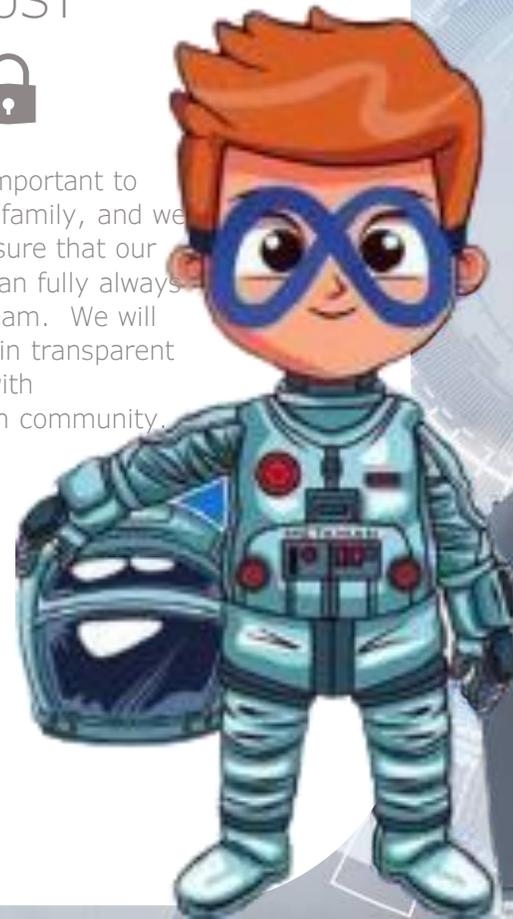

SECURITY is vital to the growth and sustainability of MetaMan. As we aware of all the recent scams in the BSC network, security and safety is our number 1 priority that is why we will audit our contract and ensure that our community can check our contract before they buy. Our Liquidity will be locked for 365 days through MUDRA.

TRUST

Trust is important to the MetaMan family, and we want to ensure that our community can fully always trust the team. We will always remain transparent with the MetaMan community.

METAMAN APP

- Track the value of your \$METAMAN holdings with our new App!
- Be notified of upcoming project news, milestones, and community events, contests, In-app airdrops, and Charting Capabilities.
- Track Your Entire BSC Portfolio.
- Integrate with a prominent, privacy-focused crypto payments token for direct merchant transactions.
- Trading Platform built on top of pancake swap, with an orderbook (i.e., limit orders and advanced order types such as trailing stop-losses) Leverage/spot margin trading up to 5x

We have no interest in fixing something that is not broken our design is very much inspired by other on-chain spot margin trading protocols, in particular Solana's Mango Markets and Ethereum's Aave. We will bring these innovations to BSC. We will follow the approach of Mango Markets and require an initial collateral ratio of 120% and a maintenance collateral ratio of 110%. If the user's collateral ratio drops below 110%, the account will be liquidated. The value of the account will be calculated using a decentralized oracle. Anyone can run a liquidator with the opportunity to make a profit. The lending pools work like the lending pools on Aave, except that user will earn interest on both their deposits as well as their positions (so you may be earning net interest on your margin position!). The interest rate is a function of the utilization ratio: total borrowed by all users divided by total deposits of all users. The interest rate will increase slowly approaching a utilization ratio of 70% but will increase rapidly above that to encourage the market to deposit more funds.

METAMAN GAME

Our development team is working hard on an 2d infinite play to earn running game, the game will feature our character METAMAN in an infinite climb to new highs of the market. We are going to integrate play to win features in the game as we develop. We will run community competitions we graphics and designs from the community will be incorporated into the game. We take pride in giving the community the opportunity to take part in our development.

The METAMAN Game will be sidescrolling endless runner action video game.

METAMAN will have challenges that will reward our investors. this game will be one of its kind play to earn game in the DeFi space. MetaMan will also introduce a number of vanity items to the game that will be purchasable via our own tokens that you can either earn by playing the game or buy directly in game.

METAMAN will be an adrenaline packed, fun filled adventure. we believe we can instil that greatness and rush into a game created solely for the DeFi space.

NFT MARKETPLACE

METAMAN is pleased to announce the upcoming release of our rare collection of NFTs 3DMETAPUNKS!! The 3DMETAPUNKS collection will consist of 10 different 3DMETAPUNKS characters which will all have different abilities to use within the METAMAN game!
The first character of our unique 3DMETAPUNKS collection will be Blueprint! Initially only 50 Blueprint NFTs will be minted and as a thank you from the METAMAN team to our loyal community these will be airdropped randomly!

METAMAN team will be developing an NFT Marketplace for all kinds of digital assets and crypto collectibles. Users will be able to trade, buy, swap, sell, auction, bid and discover digital art and assets. Content creators will be allowed to produce their own NFTs on the blockchain using METAMAN's NFT minting feature. There is no need for content creators to have any programming knowledge to make collections and NFTs. Apart from this, METAMAN will employ its own artists and upload its own content for sale to the public. We will create and sell NFTs and the money made generated will be put straight back into METAMAN coin and its development.

Users who sell content or NFTs will be able to sell an item for a fixed price, create a declining price listing, or make an auction listing.

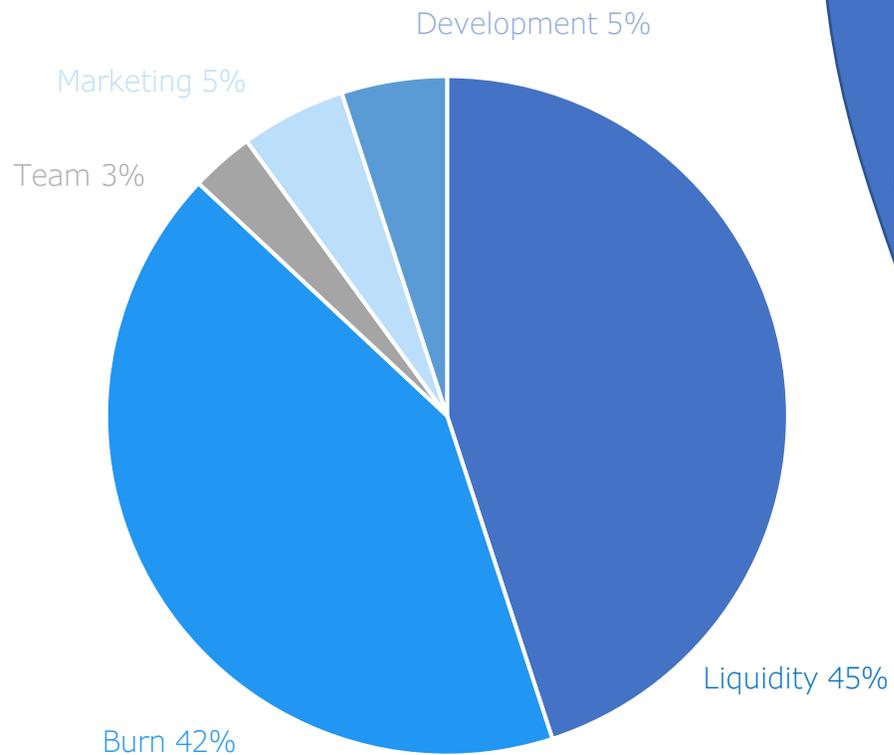

All kinds of content will be welcomed whether they are images, photos, digital art, music files, 3d models, movies, concert hosting's, books or videos.

This provides artists complete control over their careers, allowing them to achieve their goals without having to pay large fees to larger agencies. The Binance smart chain (BEP-20) utility token for this NFT marketplace allows artists and produce can turn their ideas into NFTs, mixing music, art and gaming with collectible NFTs. The METAMAN NFT Marketplace will be powered by the METAMAN token (\$METAMAN0 meaning all transactions will be made through this token.

TOKENOMICS

DISTRIBUTION

FEEES

10% Tax Fee

4% of each transaction redistributed to all METAMAN Coin holders.

6% of each transaction will be added to auto-locked liquidity on Pancakeswap.

ROADMAP

PHASE 1

- Creation Of MetaMan
- Website Launch
- Launch Socials
- Coin Listing Applications
- Pancakeswap Launch
- 1,000 Telegram Members

PHASE 2

- Marketing Campaign
- Promoted Coins
- Twitter Influencers
- Telegram Promotions
- CG & CMC Application
- 5,000 Telegram Members

PHASE 3

- CoinGecko Listing
- CoinMarketCap Listing
- Full Audit
- Partnerships with Facebook, YouTube, Instagram, Twitter, TikTok and Telegram influencers.
- 10,000 Telegram Members

PHASE 4

- Release of METAMAN App
- Release of METAMAN P2E Game
- NFT Marketplace
- Billboard Ads
- CEX Listings
- Announcement of future Development
